The Course Director

Dominic Hassall

BDS MSc (Manc) FDS RCPS (Glasg) MRD RCS (Edin) FDS (Rest Dent) RCS (Eng)

Restorative, Prosthodontic, Periodontal and Endodontic Specialist.

President British Academy Aesthetic Restorative and Implant Dentistry (BAARID).

Dominic is one of the world's leading clinical restorative, implant and aesthetic dentists.

Dominic has trained and been assessed to the highest clinical level undergoing a full restorative consultant training programme. He has been awarded the membership in restorative dentistry and the highly prestigious intercollegiate speciality fellowship in restorative dentistry jointly awarded by the English and Scottish Royal Colleges.

In addition he has trained extensively in North America and Europe in advanced restorative, aesthetic and implant dentistry.

He is Clinical Director of Smile Concepts' Private and Multidisciplinary Specialist Referral, Implant and Cosmetic Centre, and is Director of the Dominic Hassall Training Institute.

Dominic is a former Harley Street Consultant and is registered on 4 specialist lists.

He is a pioneer in postgraduate dental education initiating the UK's very first MSc in Restorative Cosmetic Dentistry and the MSc Restorative and Aesthetic Dentistry, University Warwick. He was course director for both courses before focusing on his own training institute, enabling him to provide more clinically focused and cutting edge training.

He has published extensively on a range of clinically related restorative, aesthetic, occlusal and implant topics and is editor-in-chief of the International Journal of Advanced Clinical Dentistry.

He is President of BAARID an organisation committed to promoting excellence in clinical dentistry through world leading and innovative postgraduate dental education.

He was an examiner for the Membership in Restorative Dentistry, Royal College of Surgeons England and lectures both nationally and internationally.

Currently he spends 3 days a week undertaking advanced restorative, aesthetic and implant dentistry and private general practice, devoting the remaining time to sharing his experience and skills with other dentists.

"Dominic has great knowledge, he presents research-based, quality cases, and he delivers lectures in a way that is friendly and approachable."

Dominic Hassall
Training Institute

Training Philosophy and Venue

Dominic Hassall Training Institute courses are designed to expand the clinical skills of the dental practitioner via a range of teaching methods including seminars, lectures, case presentations, videos, web based learning and numerous practical and tooth preparation exercises. **All courses are approved for verifiable CPD.**

The majority of our courses are led by Dominic Hassall. Some courses are also delivered by specialists and experts in their relevant fields working in practice, having undertaken extensive postgraduate education and have a passion for the delivery of exceptional postgraduate education.

Our courses challenge outdated concepts and philosophies enabling you to provide cutting edge predictable and profitable dentistry.

Facilities at the Dominic Hassall Training Institute are state of the art with purpose built lecture room, separate clinical skills facility and 5 teaching surgeries and in-house CBCT scanner.

All our courses provide verifiable CPD and are undertaken in small groups of a maximum of 15, for personal attention.

The Training Institute is located centrally in the UK, in Solihull, which has superb national and international transport links, being only five minutes from the M42 and ten minutes from the M6 and M40 motorways. Birmingham International Airport / Rail Station is 10 minutes by taxi or bus. Solihull Station is 5 minutes by taxi or bus.

"Well worth the money as my income has increased significantly."

Courses We Offer

PG Cert in Contemporary Restorative and Aesthetic Dentistry (Level I Intermediate)

Residential or online blended –
Counts as credits towards Restorative
Aesthetic Diploma

Advanced Course in Restorative and Aesthetic Dentistry (Level II)

Residential or online blended –
Counts as credits towards Restorative
Aesthetic Diploma

PG Cert Contemporary Tooth Preparation Techniques and Operative Dentistry

Residential

Contemporary Endodontics

Residential

Practical Occlusion

Online

Bioclear Method Composite Courses (Levels 1,2, 3.0 and 4)

Residential

"By attending this course I'll be able to avoid and prevent unwanted outcomes/ failures of the private dental work undertaken."

"I have travelled all the way from Australia for this course, and it has been worth it!"

"In an ideal world, all dental graduates should have the possibility and privilege to attend these kind of lectures."

Residential Training or Blended Online Learning

The way we live our lives has been changing rapidly, and our learning habits have been changing too. The traditional classroom environment is still right for many of our postgraduate students, but a growing number prefer the flexibility and freedom that online learning can give them.

Many dentists who want to further their career with the DHTI courses, until recently have only had the option of residential courses, and some couldn't afford the time or travel expenses to attend.

You will see that some of our most popular courses are now available in the traditional residential format, as well as an online blended version, which have been very successful.

Our residential courses are continually increasing in popularity as well, so it seems many of you want to still learn in this way, but there has also been an increasing trend to online learning, and the online blended format has had an amazing response.

The Certificate at the end will be the same as the traditional one, and verifiable CPD is accumulated as you progress through the course.

The forum and webinars act as an online community where you have access to Dominic as well as like-minded students.

The course material is organised into modules and lessons making it very easy to follow. You can download and watch the videos on any device, and there is downloadable supporting material.

The quality of the video presentations is exceptional with excellent audio visual. You can experience the quality on the website just visit www.dominic-hassall-training.co.uk

"About your on-line course, what can I say-it is a brilliant idea. I had been considering for a while to attend a similar course in Manchester; and one day my husband told me about your on-line course."

"I think I've made a great choice; for me it is excellent, it suits me perfectly- I can watch videos, read articles whenever I have time. I can even re-watch them-which is not possible with a 'normal' live course."

Visit www.dominic-hassall-training.co.uk to find out more and book courses.

PG Cert in Contemporary Restorative and Aesthetic Dentistry

13 days **residential** (Fridays or Saturdays), or **online blended** with 8 days online and 5 days hands-on

Grants membership of BAARID and counts as credits towards BAARID Diploma.

This comprehensive modular course is designed for all dentists who undertake restorative or aesthetic dentistry and wish to improve their knowledge and practical skills.

The demand for advanced restorative and aesthetic dentistry is rapidly expanding as are patient expectations. This is combined with ever increasing choices in terms of techniques and materials which can be confusing for the practitioner.

The course is designed to introduce systems and techniques which will allow you to create a more predictable, enjoyable and profitable restorative and aesthetic practice.

There are numerous hands on practical sessions and tooth preparation exercises that are undertaken in small groups of a maximum of 15, for personal attention.

Bioclear practitioners will have the opportunity to be included in the Bioclear International data base.

For further details visit

www.dominic-hassall-training.co.uk/courses

A deposit of £400 + VAT is required to reserve a place. The remainder can be paid in easy-to-manage monthly payments.

All fees include course materials, supporting literature and access to online materials. Plus lunch on the residential and hands-on days.

visit www.dominic-hassall-training.co.uk to find out more and book courses.

Course Overview: residential

This course is held at the Dominic Hassall Training Institute Learning Centre in Solihull, UK.

The 13-day course begins in September and finishes in July.

You have a choice of Fridays or Saturdays. The dates are on the website.

Every course day will involve a high level of practical hands-on work.

Course Overview: online blended

This course has the equivalent of 8 days online and a 5-day hands-on section.

Together the course gives you the same information as the residential course, organised and presented in a slightly different way.

The 5-day hands-on part of the course is held at the DHTI Learning Centre in Solihull, UK.

The online section can be taken independently of the full course. To be awarded the certificate the whole course must be undertaken.

Modules:

Aesthetic module

- Rules and tools in smile design - case presentation
- Medico legal aspects and consent
- Shade taking/laboratory communication
- Clinical photography
- Predictable tooth whitening

Periodontal module

- Current concepts in diagnosis and treatment
- Systemic and topical antimicrobials
- Links with systemic diseases
- Patient motivation and co-diagnosis
- Restorative and aesthetic implications of the biologic width

Aesthetic and surgical periodontics module

- Surgical crown lengthening
- Electrosurgery
- Aesthetic / regenerative periodontal surgery
- The ovate pontic concept / ridge preservation techniques

Occlusion module

- Practical occlusion in restorative/aesthetic dentistry
- Articulators in restorative and aesthetic dentistry
- Face bow recording / mounting models on the articulator
- Functional and aesthetic diagnostic wax ups

- Occlusal deprogrammers and splints
- Clinical aspects occlusal disorders

Complex treatment module

- Comprehensive risk based assessment and treatment planning
- Co-diagnosis, patient communication and conversion
- Multidisciplinary management of the failing dentition
- Treatment strategies tooth surface loss
- Dental implants in practice
- Predictable precision attachments for the GDP
- Removable prosthodontics
- Aesthetic and functional aspects of short term, comprehensive and lingual orthodontics

Anterior and posterior aesthetics module

- Material selection
- Anterior composites, Bioclear Method L1
- Posterior composites, Bioclear Method L2
- Anterior and posterior veneers
- Inlays and onlays
- Conventional and all ceramic crowns and bridges
- Adhesive and fixed moveable bridges
- Successful impressions and soft tissue handling
- Avoiding failure in aesthetic and restorative dentistry
- Core techniques, post systems, cements and bonding

Advanced Course in Contemporary Restorative and Aesthetic Dentistry (Level II): 13 days

13 days **residential** (Fridays), or **online blended** with 7 days online and 6 days hands-on

Leading to PG Diploma in Restorative and Aesthetic Dentistry

Prerequisite, PG Cert Contemporary Restorative and Aesthetic Dentistry (LEVEL I).

This unique course expands on the skills developed in the Certificate course and can lead to the prestigious award of Fellowship of BAARID on successful completion of the Diploma.

It is designed to give you the confidence to tackle more complex restorative, aesthetic and implant cases by offering case mentoring as part of the Diploma.

There will be numerous treatment planning exercises and in depth discussion of clinical cases as well as practical occlusion exercises.

Biolear practitioners will have the opportunity to be included in the Biolear International data base.

Course Overview: residential

This course is held at the Dominic Hassall Training Institute Learning Centre in Solihull, UK.

The 13-day course begins in September and finishes in July.

The course is on Fridays. The dates are on the website.

Each course day will involve a high level of practical based work.

Course Overview: online blended

This course has the equivalent of 7 days online and 6 days hands-on split into two 3 day sessions.

Together the course gives you the same information as the residential course, organised and presented in a slightly different way.

The 6 days of hands-on learning is held at the DHTI Learning Centre in Solihull, UK.

The online section can be taken independently of the full course. To count as credits towards the Diploma the whole online blended course must be undertaken.

Modules:

Appraisal of the dental literature, clinical techniques and dental materials module

- Critical appraisal of the dental literature
- Evidence based dentistry

Contemporary advanced treatment planning module

- Clinical case presentation
- Treatment planning the complex restorative, aesthetic and implant case
- Predictable restorative and aesthetic treatment

Complex treatment module

- Aesthetic and functional rehabilitation of tooth surface loss
- Clinical applications of the Dahl appliance
- Tooth surface loss from composite to overdentures
- The shortened dental arch and restorative solutions
- Laboratory aspects of aesthetic and implant cases
- Advanced partial dentures
- Predictable precision attachments
- Advanced direct composite veneers, Bioclear Method L3.0
- Direct overlay restoration, deep furcation and Class II restorations, Bioclear Method L4

Advanced bridgework

- The complex crown, bridge, implant and aesthetic case with endodontic and occlusal issues
- The hemisection bridge and crown
- Using the natural tooth as a pontic in adhesive bridgework
- The problem of the last standing tooth

Orthodontic interface module

- Clinical applications of occlusal splints and deprogrammers
- Re-organising the occlusion
- Occlusal considerations in restorative, aesthetic and implant dentistry

Advanced clinical occlusion module

- Aesthetic and functional orthodontic solutions
- The orthodontic/restorative/implant interface

Advanced clinical occlusion module

- Restorative led implant planning
- Implants in the aesthetic zone
- Implant assisted dentures
- Restorative procedures and materials in implant dentistry
- Maintenance and complications in implant, restorative and aesthetic dentistry

PG Cert in Contemporary Tooth Preparation Techniques and Operative Dentistry: 7 days

Opportunity to be Level I and Level II Bioclear practitioners and be included in the Bioclear International data base.

This course is designed for all dentists who undertake tooth preparation and operative dentistry. There is an emphasis on tooth preparation and practical exercises.

The course is designed to improve your tooth preparation skills and selection of materials and techniques, thereby increasing your predictability and profitability with both direct and indirect restorations.

Course Overview:

- Principles of successful tooth preparation
- Anterior composites (interproximal/ diastema closure/black triangle treatment/ peg shaped laterals) Bioclear L1
- Posterior composites (occlusal/ interproximal) Bioclear L2
- Minimal intervention restorations
- All ceramic crowns and bridges
- Anterior and Posterior veneers
- Inlays and onlays
- Gold and metal ceramic crown and bridges
- Fixed moveable and adhesive bridges
- Soft tissue handling and impression taking
- Surgical crown lengthening and electrosurgery
- Provisional restorations
- Dentine bonding
- Cementation choice and techniques
- Shade taking and laboratory communication
- Core and post techniques and materials
- Material selection & minimising failure

Tooth Preparation exercises include:

- Minimal intervention restorations
- Anterior and Posterior veneers
- Anterior composites (Interproximal/ diastema closure/black triangle treatment/peg shaped laterals)
- Posterior composites (Occlusal/ interproximal/overlay)
- Ceramic inlays and onlays
- All ceramic crowns and bridges
- Gold/metal ceramic crowns and bridges
- Fixed moveable and adhesive bridges

Practical exercises include:

- Smile design
- Shade taking and laboratory communication
- Surgical crown lengthening and electrosurgery

Contemporary Endodontics: 2 days

This highly practical course is designed for dentists who would like to further their endodontic skills to provide high quality endodontics in their practices.

Course Overview:

- Principles contemporary endodontics
- Endodontic treatment planning
- Introduction to magnification
- Access cavity design
- Ultrasonics in access cavity preparation
- Contemporary canal shaping systems
- Current obturation techniques and materials
- Re-treatment techniques/complications
- Post/instrument removal techniques
- Restoring root filled teeth

Practical exercises include:

- Magnification
- Obturation techniques
- Location of the root canal system
- Post removal
- Canal preparation techniques
- Removal of root filling materials
- Rotary and reciprocating systems/ fractured instruments

"The blend of online learning and hands on sessions was a great way to balance further education whilst still working full time."

visit

www.dominic-hassall-training.co.uk
to find out more and book courses.

Clinical Occlusion & TMD: Online

Online with the equivalent of 3 days in CPD hours

This innovative course is designed for all dentists who want a logical and practical approach to understanding occlusion.

This course will allow you to incorporate predictable occlusal techniques into your clinical practice.

Course Overview:

- Examination of the occlusion and TMD system
- Diagnosis and treatment of occlusal disorders
- Diagnosis and treatment TMD disorders
- Articulators: uses, selection and face bow records
- Occlusal philosophies
- The re-organised occlusal approach and safely increasing the OVD
- Centric relation and how to record it
- Soft bite guards, hard free plane splints, restorative splints and deprogrammers/anterior bite planes
- Treatment localised and generalised tooth surface loss
- Role of orthodontics in occlusal correction
- The Dahl concept
- Role occlusal adjustment and equilibration
- Functional: aesthetic diagnostic wax ups
- Occlusal aspects:
 - Toothwear
 - Implants
 - Bridges

The course includes numerous clinical case presentations; over 3 hours of practical clinical videos are included as well as full reading materials.

Bioclear Method Composite Course (Levels 1-4, 2 x 2-day courses)

This highly practical course is designed for all dentists who wish to increase their skills in modern techniques for successful composite restorations.

The Bioclear method represents a truly innovative development in the provision of both anterior and posterior composites. It introduces the use of the heated "injection moulded" composite placement technique in conjunction with the use of the anatomically shaped David Clark matrix system.

It provides highly aesthetic, well adapted anatomically shaped anterior and posterior composites with excellent longevity.

The Dominic Hassall Training Institute is an International Bioclear Learning Centre; therefore delegates who complete the course at the BLC will become Certified Bioclear Practitioners.

Instructed by Dr Claire Burgess, the certified UK Bioclear Method Instructor.

The Bioclear composite course includes Levels 1 and 3 (foundation and advanced anterior composites) and Levels 2 and 4 (foundation and advanced posterior composites). This format for the courses will be available from September 2017.

The courses are focussed on anterior composites for one course, then posterior composites for the second course.

This method of learning has been shown in USA to be the most effective.

As Certified Bioclear practitioners there will also be the opportunity to be included in the Bioclear International data base.

*"Small group approach for questions and answers.
Plenty of hands on."*

visit

*www.dominic-hassall-training.co.uk
to find out more and book courses.*

Anterior Bioclear Composite Restorations: 2 days

Level 1 Introduction to anterior solutions:

This course day focuses on the introduction of the injection moulding composite technique using heated composite materials and the mirror finish polishing technique. It includes the Clark class III cavity design and treatment of black triangles and undersized teeth

Level 3: Advanced Anterior Solutions: (Full Aesthetic Veneers):

All Level 3 courses focus on large complex cases that require treatment planning and advanced techniques.

Focus will be on using Direct Bioclear Method composite veneers as an alternative to porcelain crowns and veneers.

COURSE OVERVIEW:

- Bioclear Method background and method
- David Clark Matrix selection and adaptation
- Heating and injection moulding of composite materials
- Biofilm removal
- Clark 2-step polish technique
- Clark class III cavity design with radius/infinity margin
- Injection moulding for class III restorations
- Black triangle closure/treatment
- Reshaping undersized teeth
- Treatment of peg laterals
- Direct composite veneers

Posterior Bioclear Composite Restorations: 2 days,

Level 2: Introduction to posterior solutions:

This course provides a new pathway for dentists to transition from GV Black dentistry, to the extraordinary world of modern composite dentistry using the Bioclear Method.

This course introduces the Clark class II and the 'Calla Lilly' cavity designs.

Level 4: Advanced posterior solutions:

Delegates will perfect treatment of back-to-back Clark Class II (Non-retentive saucer preparations) and discover the benefits of the new opportunistic Class II and direct overlay restoration.

COURSE OVERVIEW:

- Modern science of durable posterior composite
- Prevention of white lines and visible margins in composites
- David Clark Matrix selection and adaptation
- Heating and injection moulding of composite materials
- Biofilm removal
- Clark 2-step polish technique
- Clark class II cavity design
- Injection moulding for interproximal Class II restorations
- Direct composite overlay restorations.

"Totally new approach to anterior and posterior composites, total change in process" "Excellent"

The Dominic Hassall Training Institute has been a great success, and listening to our students and partners is an important part of ongoing development and improvement.

Administration

As the DHTI has grown there have been mounting pressures on the administration and organisation of the courses and delegates, so to stay efficient we had to make changes.

Email

Rather than spending lots more time and resource on admin we needed to automate many of the processes required. The most efficient way to do this is to use email to inform you about course requirements and payment details.

New Website

You can get more course information than ever before on our website and there are still more improvements happening this year. These will help you to make an informed choice about which course suits you as that is our main focus with the new website.

Online Payment System

The online payment system really helps cut down our administration time. This means we can spend our best time on delivering great course content to you.

The online payment system really has been a great success, and as we listen to you we have tweaked and adapted the system to suit our students.

There are new improvements happening this year to help even further, so you will find it even easier and quicker to book the course you want in the most efficient way.

Course Costs

What is even more important than cost is quality – quality of the course content, and quality of delivery, making it easier to consume and learn.

However, we know that cost is important to you. The improvements we regularly make have contributed to being able to keep our daily rate at the same level for many years.

£445+ VAT per day, including supporting materials, online videos, and lunch when resident.

£495+ VAT per day for Saturday only residential courses.

Online and online blended courses are the same cost as the residential courses, even though you have continuous access to similar content, and you save time and travel expenses.

visit

www.dominic-hassall-training.co.uk
to find out more and book courses.

British Academy Aesthetic Restorative and Implant Dentistry (BAARID)

BAARID is committed to promoting clinical excellence in dentistry through world leading postgraduate training.

Our varied range of courses keeps the busy practitioner updated in all aspects of contemporary dentistry.

All of our courses focus on developing skills that you can introduce into your practice.

The latest evidence based research is combined with practical exercises to create a cutting edge and rewarding learning experience.

Whichever course you choose it will equip you with the skills to undertake more predictable, profitable and enjoyable dentistry.

The certificate course in Contemporary Restorative and Aesthetic Dentistry (Level I) is unique as it grants Membership of BAARID. It also counts as credits towards the BAARID Diploma in Restorative and Aesthetic Dentistry. This allows you to continue your training in a mentored and supportive environment.

BAARID membership allows you to stay updated with the latest clinical techniques and clinically related research. It allows exclusive access to the BAARID web site which contains a wealth of clinically related materials including:

- Web based lectures and seminars
- On-line journal 'The International Journal of Advanced Clinical Dentistry'
- The latest comprehensive assessment forms
- Information on study clubs and clinical update days
- Online forum
