

GDC Development Outcomes.

Learning Objectives:

- Know and understand the 5 Pillars of the Bioclear Method.
- Maximise enamel adhesion, minimize dentine adhesion.
- Learn to injection mould and treat black triangles and peg laterals.
- Reconstruct fractured incisors and treat rotated teeth with “instant ortho”.
- Tissue recessions: adding the root overlay to cover cervical abrasions, recession, dark roots, and more.
- Understand and complete the reconstruction of a maxillary sextant.
- Add sufficient volume to brighten the tooth shade.
- Smile design, tooth form, and arch form: what to look for and how to plan your procedures to achieve a pleasing appearance.
- The Golden Rule of proportion.

Development Outcomes:

A:

Improved understanding of direct anterior composite treatment options for patients allowing for more in depth patient discussion relating to options, outcome, and longevity.

Improved ability for discussion on patient consent with example Bioclear Patient Information and Patient Maintenance and Instruction leaflets provided within the course content.

B:

Improved diagnosis and treatment in direct anterior composite dentistry

C:

Current concepts in direct anterior composite restorations

Current concepts in modern anterior cavity design

Concepts of the Bioclear Method

Concepts of Biofilm removal

Concepts of Monolithic composite restorations

D:

Essential knowledge for predictable direct anterior composite restorations.
