

## **GDC Development Outcomes.**

### Key Learning aims, objectives and anticipated outcomes:

- Know and understand the 5 Pillars of the Bioclear Method.
- Learn to perform Calla Lily preparations, Bioclear posterior Overlays, and selective caries removal.
- Know the seven keys to consistent Class II contacts
- Know what deep margin acquisition is and how to manage it.
- Learn to replace old amalgams/alloys and update preparations using engineering principles for new non-retentive compression-based preparations, rather than outdated GV Black tension-based preparations
- Understand how to treat split and cracked teeth
- Learn how to perform a quadrant strategy restoration using the Bioclear Method.

### Development Outcomes:

A:

Improved understanding of direct anterior composite treatment options for patients allowing for more in depth patient discussion relating to options, outcome, and longevity. Improved ability for discussion on patient consent with example Bioclear Patient Information and Patient Maintenance and Instruction leaflets provided within the course content.

B:

Improved diagnosis and treatment in direct posterior composite dentistry

C:

Current concepts in direct posterior composite restorations

Current concepts in modern posterior cavity design

Concepts of the Bioclear Method

Concepts of Biofilm removal

Concepts of Monolithic composite restorations

D:

Essential knowledge for predictable direct posterior composite restorations.
